

# Planting your new tree

Banks Street, Weston Park  
YARRALEMULA ACT 2600  
Ph: (02) 6281 5353

Dig a hole roughly twice as wide as the pot. If it is a bare-rooted tree, make the hole 1m wide and 50cm deep, with rough sides and bottom. Add two handfuls of Healthy Earth Instant Clay Breaker and roughly mix into the bottom.

To the soil from the hole:

- Add 1/3 compost: 2/3 existing soil
- Add 1/2 handful Healthy Earth general purpose fertiliser and 1 handful Healthy Earth Instant Clay Breaker per 1m hole
- Mix thoroughly and return 1/3 to the hole (A)

Set your tree in position, and backfill the remainder of the hole (B).

- Sprinkle another 1/2 handful of Healthy Earth general purpose fertiliser
- Put tree stakes in place (C)
- Water thoroughly with around 20L/tree
- Water once a week thereafter
